

## MAMMAL FINGER PUPPETS

Directions : Color your animals, cut out, wrap strip around finger and cut paper on both sides for a snug fit, glue ends together, put on finger.

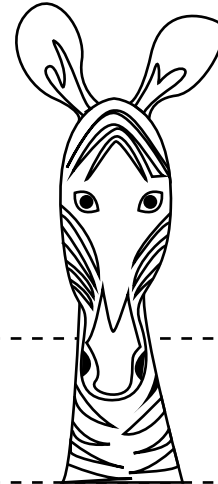

### AMERICAN BLACK WELSH MOUNTAIN SHEEP

These sheep are herbivores, so their diet mostly consists of grasses, hays and oats.

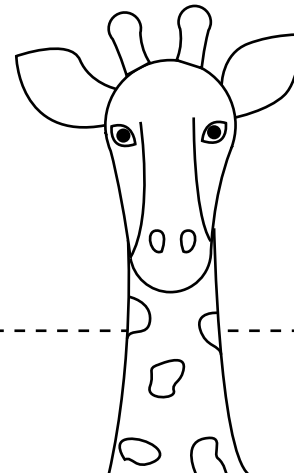

### STRAW-COLORED FRUIT BAT

The straw-colored fruit bat is native to Sub-Saharan Africa.

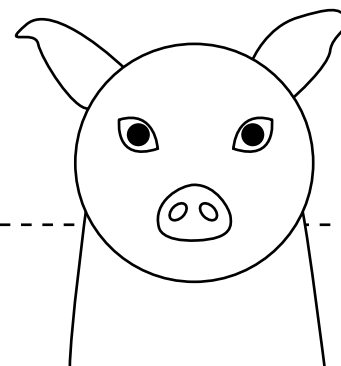

### GREVY'S ZEBRA

Grevy's zebras communicate with a variety of sounds including squealing, braying and grunting.

### MASAI GIRAFFE

Their tails are long with a tassel at the end used to swat insects.

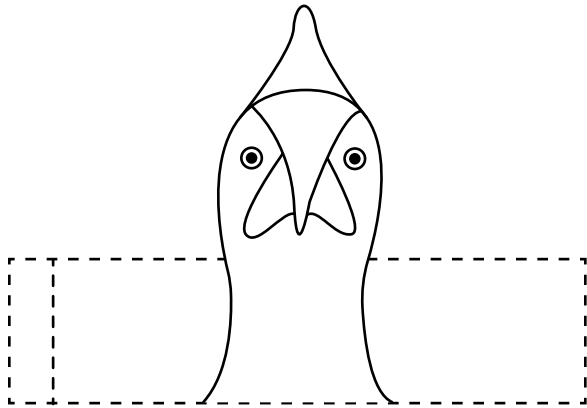

### GUINEA HOG

Guinea hogs have hairy coats, upright ears and a curly tail.

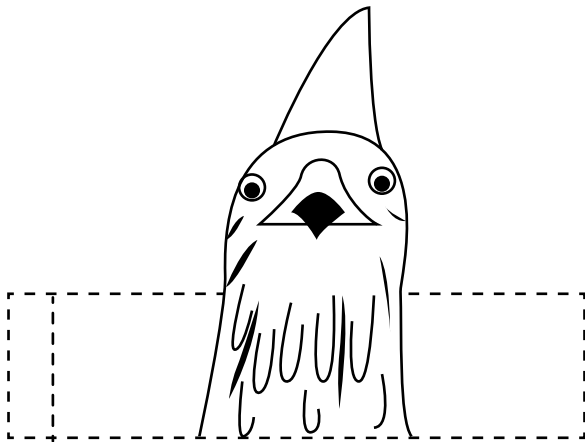

## BIRD FINGER PUPPETS

Directions : Color your animals, cut out, wrap strip around finger and cut paper on both sides for a snug fit, glue ends together, put on finger.

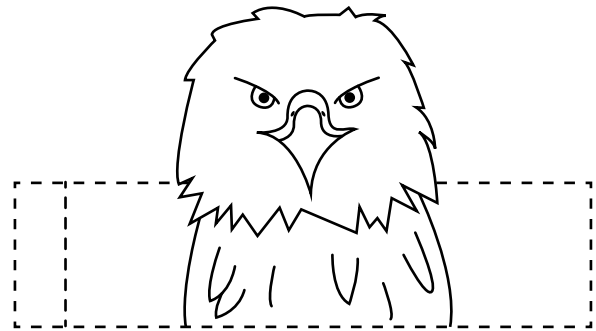

RHINOCEROS HORNBILL

Hornbills have what appears to be a second beak, or "horn," growing out of their forehead, hence the name "hornbill."

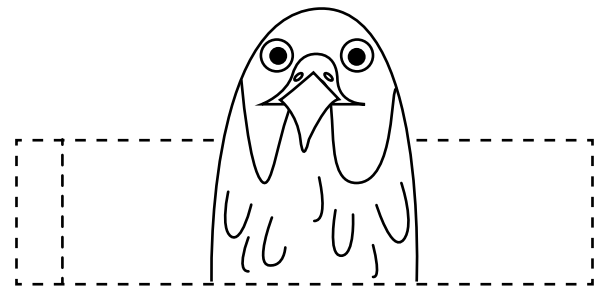

ROADRUNNER

As their name suggests, roadrunners actually prefer running to flying.

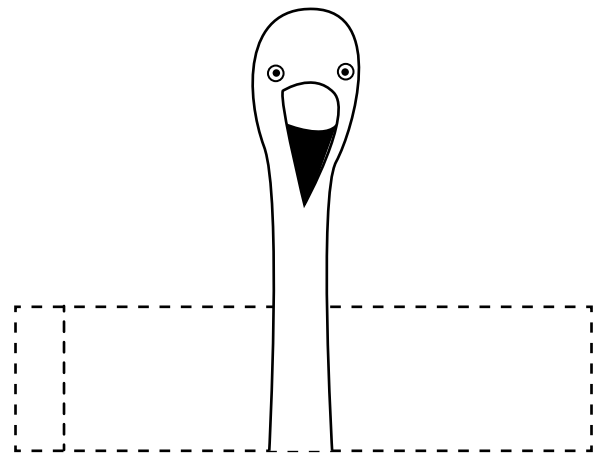

BALD EAGLE

Bald Eagles are top predators, and they have few predators aside from humans.

PEREGRINE FALCON

Peregrine falcons have streamlined, "torpedo-shaped" bodies that help them dive at speeds over 200 miles per hour.

CARIBBEAN FLAMINGO

Flamingos have long legs that help them wade into deeper water than other birds.
